

Summary

Software Engineer specializing in Frontend and Full Stack development using React, Next.js, and TypeScript. Experienced in building scalable web applications, REST API integration, and authentication systems (JWT, OAuth). Strong focus on performance optimization, responsive design, and modern UI/UX practices. Passionate about clean code, problem-solving, and collaborative development.

Professional Experience

- Full Stack Developer Intern — EngTechno

Apr 2026 – Present
Cairo, Egypt

 - Building full-stack web platforms for clients across Egypt and the Gulf using Next.js, React, TypeScript, and Tailwind CSS.
 - Integrating headless CMS solutions and backend services to deliver bilingual (EN/AR) web experiences with RTL support.
 - Focused on performance optimization, clean architecture, and shipping maintainable features at scale.
- Full Stack Developer Trainee — Information Technology Institute (ITI)

Jul 2025 – Nov 2025
Giza, Egypt

 - Developed 3+ responsive web applications using React, Next.js, and TypeScript, improving mobile user engagement by 15% through mobile-first design and CSS Grid/Flexbox.
 - Integrated REST APIs and implemented secure NextAuth/JWT authentication flows, reducing login latency and ensuring secure data access for all users.

Projects

- Mobile App Developer — Salaty

Flutter, Dart, Provider/Riverpod, Flutter Localizations, Adhan Package

 - Developed a cross-platform mobile application used for real-time prayer tracking, improving user engagement through notifications and localization features
 - Added full Arabic/English support with dynamic RTL/LTR switching and per-prayer adhan notifications.
 - Designed a daily prayer tracker with monthly progress charts and a smooth dark-mode UI.
 - Configured CI/CD with GitHub Actions and deployed cloud-based Android APK builds via Codemagic / Fastlane.
- Frontend Developer — Hawash Law

Next.js, TypeScript, Tailwind CSS, Framer Motion

 - Architected a scalable, type-safe Next.js App Router architecture.
 - Implemented fluid UI animations with Framer Motion to enhance engagement and brand authority.
 - Engineered a responsive, accessible design system using Tailwind CSS for all device types.
 - Engineered Core Web Vitals to elite thresholds (0.4s FCP, 1.1s LCP) via image optimization, route-level, and lazy loading.
- Frontend Developer — Jawla Dashboard

React, TypeScript, Tailwind CSS, Redux Toolkit

 - Developed a comprehensive administrative dashboard for managing travel and tourism data.
 - Implemented complex state management using Redux Toolkit for seamless data flow and UI synchronization.
 - Built modular, reusable UI components focusing on data visualization and efficient CRUD operations.
 - Ensured high-performance data handling and a fully responsive interface across all screen sizes.
- Frontend Developer — EcoSphere (SaaS Web Platform)

Next.js, TypeScript, Tailwind CSS, Radix UI, MongoDB, AWS

 - Architected a component-driven frontend system using Next.js App Router and TypeScript.
 - Built accessible, responsive UI components with full keyboard navigation and semantic HTML.
 - Implemented secure authentication with NextAuth.js, JWT, and protected routes.
 - Applied performance optimizations including lazy loading and code splitting.
 - Designed reusable layouts and UI patterns to support future feature expansion and long-term maintainability.

Technical Skills

Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Next.js, React Native, Flutter, Tailwind CSS
Backend: Node.js, NestJS
State Management: Redux Toolkit, Context API
Authentication: JWT, OAuth, NextAuth.js, Auth0
Databases: MongoDB, PostgreSQL
Tools: Git, AWS, REST APIs

Education

Bachelor of Computer Science, Cairo University

Covered topics included Computer Science Fundamentals, Data Structures & Algorithms, OOP, Databases, Operating Systems, and Networks, alongside Data Warehousing, System Analysis, and Modern Web Technologies.

Sep 2018 – Jun 2022

Giza, Egypt
