

Summary

Frontend-focused Full Stack Engineer with hands-on experience building production web platforms using Next.js, React, and TypeScript. Delivered bilingual (EN/AR) CMS-driven experiences at a web agency serving Egyptian and Gulf clients. Strong foundation in performance optimization, component architecture, and modern authentication systems.

Education

Bachelor of Computer Science, Cairo University

Sep 2018 – Jun 2022
Giza, Egypt

Professional Experience

- Front End Developer - Simple Way

Jul 2026 – Present
El-Shorouk, Cairo

 - Optimized nested workflow task rendering by building a custom useDelegatedTasks hook, utilizing Promise.all to parallelize assignment fetching and avoid sequential API waterfalls
 - Architected a dynamic Workflow Engine UI with a scalable WorkflowActionDrawer component, abstracting complex REST API payloads to handle 10+ distinct workflow actions including Delegation and Approvals
- Full Stack Developer — EngTechno

Apr 2026 – Present
Cairo, Egypt

 - Implemented locale-aware background images using PayloadCMS v3's native localized: true field, enabling per-locale content for a bilingual EN/AR luxury automotive platform
 - Debugged and resolved scroll-triggered animation conflicts between react-awesome-reveal and custom IntersectionObserver logic, fixing a transform race condition using scale-x/origin-left approach
 - Built a token-based Tailwind color system with tailwind-merge and CVA for a reusable component library across two client projects
- Full Stack Developer Trainee — Information Technology Institute (ITI)

Jul 2025 – Nov 2025
Giza, Egypt

 - Built 3+ responsive web applications using React, Next.js, and TypeScript with mobile-first layouts using CSS Grid and Flexbox
 - Integrated REST APIs and implemented NextAuth/JWT authentication flows with protected routes and session management

Projects

- Frontend Developer — Hawash Law

Next.js, TypeScript, Tailwind CSS, Framer Motion

 - Architected a scalable, type-safe Next.js App Router architecture.
 - Implemented fluid UI animations with Framer Motion to enhance engagement and brand authority.
 - Built a responsive, accessible design system using Tailwind CSS for all device types
 - Achieved 0.4s FCP and 1.1s LCP via image optimization, route-level code splitting, and lazy loading
- Frontend Developer — Jawla Dashboard

React, TypeScript, Tailwind CSS, Redux Toolkit

 - Built modular, reusable UI components focusing on data visualization and efficient CRUD operations.
 - Managed cross-feature state for 5+ data domains (bookings, destinations, users, tours, reports) using Redux Toolkit slices with normalized store structure
- Frontend Developer — EcoSphere (SaaS Web Platform)

Next.js, TypeScript, Tailwind CSS, Radix UI, MongoDB, AWS

 - Built a full-featured eco-commerce platform with 6+ modules: product store, environmental news feed, events discovery, recycling hub, gamification system, and user dashboard
 - Architected component-driven frontend using Next.js App Router with reusable layouts supporting dark/light theming via Tailwind CSS
 - Implemented secure authentication with NextAuth.js and JWT, including protected routes and persistent session management
 - Applied performance optimizations including lazy loading and code splitting across a multi-module SaaS architecture

Technical Skills

Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, NestJS
State Management: Redux Toolkit, Context API
Authentication: JWT, OAuth, NextAuth.js, Auth0
Databases: MongoDB, PostgreSQL
Tools: Git, AWS, Figma, PayloadCMS, Postman
